

DESIGN SPECIFICATION DOCUMENT (DSD)

Project Name

GigSave – Smart Expense & Goal Tracker for Gig Workers

Version: 1.0

Document Type: Design Specification Document (DSD)

1. Design Overview

Purpose

The purpose of this Design Specification Document (DSD) is to define the visual language, user experience, layout structure, UI components, typography, color palette, spacing system, interaction patterns, and overall design guidelines for the GigSave application.

GigSave is designed specifically for gig workers such as Zomato, Swiggy, Blinkit, Zepto, Uber, Ola, Rapido drivers, freelancers, and daily wage earners. The interface prioritizes simplicity, speed, and financial clarity while maintaining a premium FinTech look.

2. Design Goals

The UI should:

- Be modern and premium.
 - Require minimal learning.
 - Display financial information clearly.
 - Allow one-hand mobile usage.
 - Support quick daily income entry.
 - Encourage users to save money.
 - Feel trustworthy and motivating.
 - Follow modern FinTech design standards.
-

3. Design Style

The application follows a **Modern FinTech** design language inspired by premium financial applications.

Design Characteristics

- Minimal Interface
 - Glassmorphism
 - Soft Shadows
 - Rounded Cards
 - Floating Components
 - Pastel Gradient Colors
 - Smooth Animations
 - Clean White Background
 - Data-Focused Dashboard
 - Premium Mobile Experience
-

-

25. Design Principles

- Prioritize clarity over complexity.

- Minimize the number of steps to complete a task.
 - Use consistent spacing and typography throughout the application.
 - Present financial data using visually intuitive charts and progress indicators.
 - Maintain a clean and uncluttered interface.
 - Use gradients and animations sparingly to highlight important information.
 - Ensure all screens follow a consistent visual hierarchy.
 - Optimize the experience for one-handed mobile use.
 - Provide immediate visual feedback for all user interactions.
 - Keep the interface fast, responsive, and accessible.
-

27. Expected User Experience

GigSave should provide a **premium, modern FinTech experience** with a clean white interface, pastel blue-purple-pink gradients, rounded glass-like cards, intuitive financial visualizations, and smooth animations. The application should make daily income tracking effortless while motivating users to save consistently and achieve their financial goals through an engaging, easy-to-understand interface.
