

Product Requirements Document (PRD)

Project Name: GigSave – Smart Expense & Goal Tracker for Gig Workers

Version: 1.0

Document Owner: Product Team

Status: Draft

1. Product Overview

Product Name

GigSave

Tagline

Earn Today. Save Automatically. Achieve Tomorrow.

Vision

To empower gig workers with a simple, intelligent, and accessible financial management platform that helps them save consistently, manage daily expenses, and achieve long-term financial goals despite having irregular income.

2. Problem Statement

Gig workers such as delivery partners, drivers, and freelancers earn variable amounts each day, making financial planning difficult. Existing expense tracking applications are primarily designed for users with fixed monthly salaries and do not support automatic saving from daily earnings.

As a result, many gig workers:

- Spend most of their daily income immediately.
- Do not maintain emergency savings.
- Lack visibility into their actual spending.
- Have difficulty achieving financial goals.
- Rarely use budgeting apps because they are too complex.

GigSave addresses these challenges through voice-first income tracking, automatic savings allocation, smart budgeting, and AI-powered financial guidance.

3. Objectives

Primary Objectives

- Help users record daily earnings quickly.
- Automatically divide earnings into savings and spending.
- Encourage regular saving habits.
- Simplify financial planning.
- Enable users to achieve personal financial goals.

Secondary Objectives

- Improve financial literacy.
 - Reduce unnecessary spending.
 - Provide AI-powered recommendations.
 - Build long-term financial discipline.
-

4. Target Users

Primary Users

- Zomato Delivery Partners
- Swiggy Delivery Partners
- Blinkit Riders
- Zepto Riders
- Uber Drivers
- Ola Drivers
- Rapido Captains

Secondary Users

- Freelancers
- Daily wage workers
- Small business owners
- Self-employed professionals

5. User Personas

Persona 1

Name: Rahul

Age: 24

Occupation: Zomato Delivery Partner

Average Daily Income: ₹900–₹1,400

Pain Points:

- Doesn't know where money goes.
- Wants to save for a new bike.
- Finds budgeting apps confusing.

Goals:

- Save ₹80,000 for a bike.
 - Build an emergency fund.
-

Persona 2

Name: Akash

Occupation: Uber Driver

Income:

Varies every day.

Needs:

- Voice input
 - Daily earnings history
 - Monthly reports
-

6. Product Scope

GigSave enables users to:

- Record income manually
 - Record income using voice
 - Record expenses
 - Create savings jars
 - Automatically allocate savings
 - Set financial goals
 - View analytics
 - Receive AI financial insights
 - Track financial health
-

7. Features

7.1 Authentication

Description

Secure user authentication.

Functional Requirements

- Sign Up
- Login
- Forgot Password
- Logout
- Secure Authentication

Priority

High

7.2 User Profile

User can manage:

- Name
- Phone
- Occupation
- Preferred Language

- Preferred Currency
- Savings Percentage

Priority

Medium

7.3 Daily Income Entry

Manual Entry

Fields

- Amount
- Date
- Income Source
- Notes

Priority

High

7.4 Voice Income Entry

Example

"I earned ₹1,200 today."

AI extracts:

- Amount
- Date
- Source

Priority

High

7.5 Expense Entry

User can record:

- Fuel
- Food
- Rent
- Shopping
- Bike Repair
- Medical
- Recharge
- Other

Supports:

- Manual
- Voice

Priority

High

7.6 Smart Savings Jars

Users can create jars like:

- Emergency
- Family
- Vehicle
- Vacation
- Education
- Investment

Each jar has:

- Percentage
- Current Balance
- Goal Link

Automatic allocation after every income entry.

Priority

High

7.7 Goals

User creates:

Goal Name

Target Amount

Target Date

Linked Jar

Example

Buy Bike

₹90,000

Current Progress

₹21,500

Priority

High

7.8 Dashboard

Displays:

Today's Income

Today's Expenses

Today's Savings

Available Balance

Goal Progress

Recent Transactions

Financial Health Score

Priority

High

7.9 Analytics

Charts

- Daily Earnings
- Weekly Earnings
- Monthly Earnings
- Expense Breakdown
- Savings Growth
- Income Sources
- Goal Progress

Priority

Medium

7.10 AI Financial Coach

Provides:

- Spending advice
- Savings suggestions
- Goal prediction
- Budget recommendation

Examples

"You spent 38% on fuel this week."

"Save ₹100 more daily to reach your goal 15 days earlier."

Priority

Medium

7.11 Notifications

Daily reminder

Goal milestone

Budget exceeded

Savings update

Priority

Medium

7.12 Offline Mode

Features

- Offline transactions
- Auto sync

Priority

Medium

8. Functional Requirements

FR-001

User shall register.

FR-002

User shall login securely.

FR-003

User shall record daily income.

FR-004

User shall record expenses.

FR-005

System shall allocate savings automatically.

FR-006

User shall create savings jars.

FR-007

User shall create financial goals.

FR-008

System shall calculate available balance.

FR-009

System shall generate analytics.

FR-010

System shall generate AI recommendations.

FR-011

User shall access voice input.

FR-012

System shall support offline mode.

9. Non-Functional Requirements

Performance

- Dashboard loads within 2 seconds.
- Voice processing under 5 seconds.

Availability

99.9% uptime.

Security

- Encrypted passwords
- HTTPS communication
- Secure authentication
- Data privacy

Scalability

Support millions of users.

Usability

Simple interface suitable for users with varying digital literacy.

Accessibility

- Large buttons
 - Voice interaction
 - Regional languages
 - High contrast mode
-

10. User Journey

11. Success Metrics

- Daily Active Users (DAU)
 - Monthly Active Users (MAU)
 - Income entries per user
 - Expense entries per user
 - Savings created
 - Goals completed
 - User retention
 - Voice feature adoption
 - AI recommendation engagement
-

12. Future Enhancements

- UPI integration
- Automatic income detection from SMS
- Bank account synchronization
- GST invoice tracking for freelancers
- Insurance recommendations

- Investment suggestions
 - Credit score estimation
 - Multi-device synchronization
 - Family sharing
 - Community savings groups
-

13. Assumptions

- Users have access to a smartphone.
 - Users are willing to record income daily.
 - Voice recognition is available in supported languages.
 - Internet connectivity may be intermittent; offline mode addresses this.
-

14. Constraints

- Accurate voice recognition depends on device and environment.
 - AI insights rely on sufficient historical transaction data.
 - Financial calculations depend on correct user input.
 - Some advanced integrations (e.g., banking APIs) may vary by region.
-

15. MVP Scope

The first release will include:

- User authentication
- Manual income entry
- Voice income entry
- Manual expense entry
- Voice expense entry
- Savings jars
- Automatic savings allocation
- Financial goals
- Dashboard
- Basic analytics
- AI financial tips
- Notifications
- Offline data support

16. Out of Scope (Version 1)

- Direct bank account integration
- Loan applications
- Investment trading
- Cryptocurrency support
- Tax filing
- Multi-user family accounts
- Desktop/web version

This PRD defines the product vision, core functionality, user flows, requirements, and MVP scope for **GigSave**, providing a strong foundation for design, development, and future feature expansion.
