

Standard Operating Procedure (SOP)

Project Name

GigSave – Smart Expense & Goal Tracker for Gig Workers

Version

1.0

Purpose

This Standard Operating Procedure (SOP) defines the workflow for using the GigSave application. It ensures that all users can consistently record earnings, manage expenses, save towards financial goals, and monitor their financial health through standardized processes.

Scope

This SOP applies to all registered users of GigSave, including:

- Delivery Partners (Zomato, Swiggy, Blinkit, Zepto)
 - Cab Drivers (Uber, Ola, Rapido)
 - Freelancers
 - Daily Wage Workers
 - Other Gig Economy Workers
-

User Roles

1. User (Gig Worker)

- Register and log in.
- Record daily earnings.
- Record expenses.
- Create savings jars.

- Set financial goals.
- View analytics.
- Receive AI insights.

2. System

- Validate user input.
 - Allocate savings automatically.
 - Update balances.
 - Track goal progress.
 - Generate reports.
 - Send reminders and notifications.
-

Standard Operating Workflow

SOP 1 – User Registration

Objective: Create a new user account.

Procedure

1. Open the GigSave application.
2. Select **Sign Up**.
3. Enter:
 - Full Name
 - Mobile Number or Email
 - Password
4. Verify OTP (if applicable).
5. Create the user profile.
6. Redirect to the Dashboard.

Expected Output

- User account successfully created.
-

SOP 2 – Daily Income Recording

Objective: Record daily earnings.

Manual Method

1. Tap **Add Income**.
2. Enter:
 - Amount
 - Date
 - Income Source
3. Tap **Save**.

Voice Method

1. Tap the microphone.
2. Speak:
"I earned ₹1,000 today."
3. AI extracts:
 - Amount
 - Date
 - Source (if mentioned)
4. Confirm details.
5. Save.

Expected Output

- Daily income recorded.
 - Dashboard updated.
-

SOP 3 – Automatic Savings Allocation

Objective: Distribute income into savings jars.

Procedure

1. Retrieve user-defined jar percentages.
2. Calculate allocation for each jar.
3. Credit each savings jar.
4. Calculate remaining spendable balance.
5. Update dashboard.

Example

Daily Income: ₹1,000

Jar	Percentage	Amount
Emergency	20%	₹200

Family	15%	₹150
Bike Maintenance	10%	₹100
Investment	10%	₹100

Available Balance = ₹450

Expected Output

- Jars updated automatically.
 - Available balance displayed.
-

SOP 4 – Expense Recording

Objective: Record daily spending.

Manual

1. Select **Add Expense**.
2. Enter:
 - Category
 - Amount
 - Note (optional)
3. Save.

Voice

Speak:

"Spent ₹250 on petrol."

AI identifies:

- Expense Amount
- Category
- Date

System deducts amount from the available balance.

SOP 5 – Goal Creation

Objective: Create a financial goal.

Procedure

1. Open Goals.
2. Select **Create Goal**.
3. Enter:
 - Goal Name
 - Target Amount
 - Target Date (optional)
 - Linked Savings Jar
4. Save.

Expected Output

- Goal created.
 - Progress tracking starts automatically.
-

SOP 6 – Dashboard Monitoring

Users can view:

- Today's Earnings
- Total Expenses
- Available Balance
- Savings
- Goal Progress
- Financial Health Score

Dashboard updates automatically after every transaction.

SOP 7 – Analytics Review

Users can review:

- Daily income trends
 - Weekly earnings
 - Monthly earnings
 - Expense categories
 - Savings growth
 - Goal completion percentage
 - Income source comparison
-

SOP 8 – AI Financial Assistant

User Commands

Examples:

- "How much did I earn this week?"
- "How much is in my emergency fund?"
- "Can I afford a ₹3,000 helmet?"
- "How many days until I reach my bike goal?"

The AI processes the request and provides personalized responses.

SOP 9 – Notifications

The system automatically sends:

- Daily income reminders
 - Savings summaries
 - Goal progress updates
 - Budget alerts
 - Achievement notifications
-

SOP 10 – Data Synchronization

1. Store transactions locally when offline.
 2. Detect internet connectivity.
 3. Synchronize unsynced data with the cloud.
 4. Resolve conflicts using the latest valid record.
-

Error Handling

Scenario	System Action
Voice recognition fails	Ask user to repeat or enter manually
Invalid amount	Display validation error
No internet	Save data locally and sync later

Duplicate transaction	Prompt user to confirm before saving
AI parsing error	Allow manual correction before submission

Security Procedures

- User authentication before access.
 - Encrypted passwords.
 - Secure cloud database.
 - Role-based access.
 - Data validation before storage.
 - Secure API communication (HTTPS).
-

Daily Operational Flow

Success Criteria

- Income recorded successfully.
 - Savings allocated automatically.
 - Expenses deducted accurately.
 - Goals updated in real time.
 - Dashboard reflects current financial status.
 - Analytics generated without errors.
 - Data synchronized securely across devices.
-

Maintenance

- Perform regular database backups.
- Monitor application performance.
- Update AI models as needed.
- Release security patches.
- Add new features based on user feedback.
